Professional Statement

Motivated and conscientious individual with 8 years IT asset disposal (ITAD), reuse, resale and stock control experience in Ireland and America.

I have invaluable experience in dealing with people on a daily basis in addressing client / customer concerns and ad-hoc queries. I am a highly motivated and driven person and I work well within a team and independently. I am calm under pressure with the aptitude to pick up ideas quickly, approach problems logically and a willingness to learn.

Over 3 years team lead experience and 4 months program lead experience, I have the ability to think rationally and lead a team under time constraints and other situational factors.

My variety of experience during my employment with Wisetek and my drive led me to secure much sought after roles and positions in the United States.

.

Management of large stock of computer components in a resale area

Contributing to the management of large groups of employees through different activities and projects.

3 years SAP training

Employment History

WisetekTM - Kilbarry Industrial Park, Dublin Hill, Co. Cork

September 2010 – February 2018

Duties

General operative in the Asset value recovery section

Dismantling of reused computer equipment Installation of cables

Cataloguing of said equipment for resale or scrap via a Microsoft Navision system

Responsible for the running of testing station of equipment before it was sent out to the field for resale

Inventory Control of all resale equipment through NAV system

Responsible for scanning and cataloguing of EMC material received from different plants across the world.

As of 2018, I am back working at the Carrigtwohill site as a team lead in the Dell© defective returns team.

Achievements

Trained 8 employees in the procedures and work instructions for the use of the Microsoft Navision system.

Promoted to team lead of the asset value recovery team in which I oversaw all daily activities of the team which consisted of 10 employees. My active role was to ensure all sections ran efficiently and accordingly each day while organising and controlling employees work hours and timesheets. These sections consisted of erasing of hard drives, cataloguing of all resale material, testing of resale equipment and packaging and shipping of sales orders.

WisetekTM

Overseas employment in the US

May 2016 – Oct 2016

Relocated to Boston as part of a major project with EMC. I was employed as a team lead to oversee a team of 6 through all daily activities, which included scanning and capturing all parts within the data centres and completing all forms within our specifically built excel sheet for this project, mapping and planning out the data centre before commencement of work

The main objective of the project was to scan and capture an inventory list of all material within the EMC data centres of the EMC buildings in the Massachusetts area.

During this time I travelled to several different states to complete data centre takeout's and moves whilst also continuing to work with the Boston team to ensure all work was being completed within the project timeline and required standards.

Sept 2017 - February 2018

Promoted to program lead and relocated to California to commence work on the setting up of a new premise for the company in Sacramento, California.

My responsibilities were pricing equipment for the new building while viewing and reporting on other possible premises for the organisation to secure a rent agreement with.

I represented the organisation at Enterprise Ireland events to promote the organisation and develop networking connections with potential clients.

I continued to be involved with the resale material of equipment tested, sales team catalogue and the packaging and shipping to customers.
